

# NeuroScience Quality Management System

Consistent products, consistent results

## Scientific Research

We formulate based on published scientific journals and data that discuss effective ingredients as well as the amount necessary for positive outcomes and balance.

## Ingredients

We audit our manufacturers to ensure ingredients meet our specifications for purity and strength.

## Manufacturers

We use FDA-inspected facilities located in the United States that are cGMP (Current Good Manufacturing Practices) compliant.

## Finished Product Testing

We contract laboratories to independently verify the purity, strength, and composition as well as test for microbiological, heavy metal, and chemical contaminants.
