Key Ingredients

L-tyrosine	<ul style="list-style-type: none"> ■ Precursor to catecholamines including dopamine, norepinephrine, and epinephrine
Rhodiola rosea root extract (5% rosavins)	<ul style="list-style-type: none"> ■ Adaptogen that has been shown to reduce stress-induced effects^{1,2*} ■ In a randomized, double-blind, placebo-controlled study, <i>Rhodiola rosea</i> was shown to significantly reduce mental fatigue and improve general well-being under stress^{2*}
L-methionine	<ul style="list-style-type: none"> ■ Precursor to S-adenosyl-L-methionine (SAMe)³ ■ SAMe is directly involved in methylation processes including catecholamine synthesis⁴

The Science

- In response to **stress**, the sympathetic nervous system (SNS) and hypothalamic-pituitary-adrenal (HPA) axis signal to the adrenals to release catecholamines (norepinephrine and epinephrine) and cortisol¹³
- **Prolonged stress** is associated with dysregulation of the HPA axis, which can affect catecholamine and cortisol levels¹⁴
